SARANSH SAHU

Freelance services & selected work | Bengaluru, India

EXPERIENCE

Service Virtualization Developer · Payments and retail APIs

Built payment simulations with ReadyAPI, Groovy and SQL. Automated QA approvals and incident triage. Supported a non-production load test in which throughput rose from 38 to 75 orders per minute after database optimisation.

PROJECTS

Artelier — Expanded an art store into a custom press-on nail shop. The checkout captures ten confirmed widths per wearer, and the owner reviews seller applications and listings.

Ten Tiny Canvases — Timed storyboard for a 12-second product ad, from the first brushstroke to the final set reveal.

FREELANCE RATE CARD

Service	Included scope	Starting fee
AI product reel	One 10–15 sec vertical edit from a supplied brief; one revision	₹4,500
Website repair	Diagnose and fix one reproducible issue; verify the fix	₹2,500
Website expansion	One scoped feature on an existing site, e.g. a form with validation	₹8,000
Latency audit	Profile one user flow; report bottlenecks and baseline timings	₹5,000
Performance fix	Implement one agreed fix and retest under comparable load	₹7,500

QUOTE TERMS

Fees are in INR and confirmed against the brief. Audit and implementation are priced separately. Hosting, paid generation credits and licensed assets are extra only if agreed in advance. Suggested payment: 50% to start, 50% on delivery.
